

# Implementing CobiT

Implementing IT Governance using COBIT & Val IT

2  
DAYS

## Introduction

**CobiT** is an authoritative, up-to-date international set of generally accepted IT management good practices and control objectives written for business executives, IT professionals and IT auditors. It continues to develop as the leading guidance and set of resources for helping organizations to better manage IT, and provides a framework for implementing **IT governance**. In response to the need for guidance on how to implement CobiT to support governance initiatives and IT management practices, ISACA has developed this new workshop specifically aimed at IT managers and practitioners. The workshop will provide newly developed methods to help guide implementation activities and is supported by several case studies.

## Main Objectives

- The principles and objectives of CobiT and the CobiT framework
- The IT Governance Institute approach to IT governance and how CobiT supports this IT management capability using the CobiT maturity models and control objectives
- How to plan control improvements using control objectives and control practices
- How to create a performance measurement framework using CobiT's metrics and scorecards

## Prerequisites

The participant should have a detailed understanding of the underlying CobiT Framework. Successful completion of the CobiT Foundation course is required.

## Format

Instructor-led classroom

## Duration

2 days

## Certification

None

Potential participants are:  
IT professionals and business managers involved or interested in the IT Governance or regulatory domains.
